Request for a modular approval

Dear Application Examiner,

The Delphian System LLC. Bluetooth module Model # SRU233 is seeking FCC authorization as a modular transmitter. The requirements of FCC 15.212 are met. The following requirements are fulfilled:

1. The modular transmitter must have its own RF shielding  
SEE print details. The transmitter is utilizing metal shield.
2. The modular transmitter must have buffered modulation/data inputs  
There is a microprocessor on the circuit board that collects the information from the digital data collection module and send this stream to the RF transmitter.
3. The modular transmitter must have its own power supply regulation  
The module contains its own 3.3 to 5.0 volt regulator for regulating the power to transmitter, regulation is not a problem.
4. The modular transmitter must comply with the antenna requirements of Section 15.203  
Antenna is solder on circuit board and is provided with each module.
5. The modular transmitter must be tested in a stand-alone configuration  
The modular transmitter was tested as stand-alone configuration.
6. The modular transmitter must be labeled with its own FCC ID number  
Prints with details are included. FCC ID is engraved into metal shield.
7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.  
All details are supplied in the supplied User's Guide.
8. The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.  
Instructions are given in the User's guide for compliance to the RF exposure requirements.

Sincerely,

A handwritten signature in black ink, appearing to read "Gary Myers", written over a horizontal line.

Gary Myers
